EXPERIMENT 10-B

27/8/26

INTERNETWOR USING WIRELESS ROUTER
DHCP Server, INTERNET CLOUD

AIM: To design and configure an internetwork using a wireless router, DHCP server, Internet Cloud in Cisco Packet Tracer and establish Communication.

ALGORITHM:

1. Open Cisco Packet Tracer
2. Place a wireless router, Wireless device DHCP server and Internet Cloud
3. Connect the required devices properly.
4. Configure wireless router with a suitable IP address & subnet.
5. Configure and enable DHCP server.
6. Configure the devices to obtain IP addresses automatically.
7. Verify the IP address and test connectivity.

PROCEDURE

1. Place the wireless router, laptop/PC's, server and Internet Cloud.
2. Connect the required wired devices.
3. Configure the wireless router's IP address and DHCP setting.
4. Set wireless device to obtain IP address.
5. Use the ping command to test communication.
6. Use Simulation Mode to Observe Packet flow, verify

RESULT:

Thus, an internetwork using a wireless router, DHCP server & Internet Cloud was successfully designed and configured.
