EXPERIMENT 10 C

INTERNETWORKING USING SWITCH, ROUTER, ETHERNET CABLES

AIM: To design and configure an internetwork using switches, router ethernet cables in Cisco Packet Tracer.

ALGORITHM:

1. Open Cisco Packet Tracer
2. Place PC, switch & router
3. Connect PC to switch, switch → router, assign IP
4. Configure router interface with suitable IP address.
5. Activate router interfaces.
6. Test connectivity using ping.

PROCEDURE:

1. Place the required PC, switch and router
2. Connect each PC to a switch using copper straight through cables
3. Assign suitable static IP address of router interfaces.
4. Activate router interfaces through CLI
5. Use the ping command to test communication between PC.
6. Observe the path of packets through the switches and router and verify successful path.

RESULT:

Thus, an internetwork using switches, a router, ethernet cables was successfully designed and configured in Cisco Packet.
