ANALYSIS OF VARIOUS TYPES OF SERVERS USING WEBALIZER

AIM: To analyze the web server log files using the webalizer tool and study various server statistics such as number of requests, visitors, transfered data, URL.

ALGORITHM:

1. Start the webalizer application.
2. Install and configure webalizer on the system
3. Locate web server access.
4. Configure webalizer with required log file.
5. Run webalizer on selected log file.
6. Webalizer reads & analyzes the server log entries.
   → generates statistics such as:
   - No. of visits
   - No. of requests
   - Pages accessed.
   - Date transfered.
   - HTTP response code.
8. Open generated HTML report in a web browser.
9. Analyse the server activity using generated graphs and tables.

RESULT:

Thus, the webalizer tool was used successfully to analyze web server log files, various server statistics such as requests, visitors, pages, bandwidth usage
