EXPERIMENT : 11B

SIMULATE RIP USING CISCO PACKET TRACER

AIM: To simulate and configure the routing Information Protocol (RIP) using Cisco Packet Tracer and establish communication between different networks.

ALGORITHM:

1. Open Cisco Packet Tracer.
2. Place, router, switch & PC
3. Connect device & ethernet cable
4. Assign IP address and configure gateway for each PC
5. Enable RIP on the routers
6. Add connected networks to RIP configuration
7. Test communication using PING.
8. Simulation mode to observe RIP-based

PROCEDURE:

1. PC1 → Switch 1 → Router 1 → Router 2 → Switch 2 → PC 2.
2. Use same IP addressing, Device, Interface, Address

Step 1: Configure Router Terminal

enable
configure terminal
router rip

Step 2: Configure Router 2

enable
configure terminal
router rip

3. On both routers, show ip route.
4. Test connectivity
   From PC1 - ping 192.168.2.2,
   From PC2, ping 192.168.1.2

RESULT:

Thus RIP was successfully configured and simulated using Cisco Packet Tracer.
