ECHO CLIENT SERVE USING UDP

AIM: To implement an echo client-server application using UDP Socket and verify communication.

PROCEDURE:

1. Create a UDP Echo Server using Datagram Socket.
2. Assign a port number to UDP Server.
5. Compile & execute UDP server program.
4. Create a UDP Echo Client using Datagram Socket
5. Specify server address & port number
6. Enter a message through client.
7. The client sends the message as UDP datagram.
8. The server receives the datagram and sends echoed message
9. Display received echoed message
10. Enter bye to terminate the communication.

RESULT

Thus, the UDP- Echo Client Server application is successfully implemented
