10/2/26 EXP 12 C

CHAT CLIENT SERVER USING TCP/UDP SOCKET.

AIM: To implement a chat client-server application using Sockets and enable communication between multiple clients.

PROCEDURE.

1. Create a chat server program using Socket Programming
2. Start or run chat server.
3. Create the chat client program.
4. Run ~~two~~ or more client program
5. Enter a name for each client
6. Send messages from one client to the server
7. The server broadcasts the message to the other clients
8. Verify the clients can exchange messages.

RESULT:

Thus, the chat client-server application was successfully implemented.
